

LBJA presents ...

**Partnering for Success
Family Math Night for Parents and Children
in Grades K - 5**

**Bring the whole family on
Wednesday, September 28, 2016, 6:00-7:30 pm at LBJA**

(Note: This program is for parents *with* their children. No unaccompanied children should attend. It is okay to bring siblings.)

Explore the wonders of math with your children! Let them show you what they are learning! A variety of activities and games will be available for you and your children to *explore together*.

To give you a clear idea of what is being taught in math this year, how it is being taught, and how you can support your child at home we are holding a **Family Math Night** on **Wednesday, September 28** from **6:00 pm to 7:30 pm**. You will have a chance to see what's new in our updated math curriculum and materials. You will also have a chance to preview the new online tools.

Your family will participate in hands-on math and you will leave with ideas, games and strategies to help reinforce math skills at home and help your children think mathematically.

“The message is simple. We all know that kids who are read to become better readers. The same is true of math. When parents show an interest in math and make it part of their everyday family life – if they do math **TOGETHER** with their children – kids become more successful at math.” *Stuart J. Murphy, noted children’s author*

Pre-registration is important for our planning and preparation. If you have any questions please email: morahrobin@lbja.org.

Please RSVP by email to morahrobin@lbja.org or by returning this flyer to school by Monday, September 19.
